Recommendations

11 Mermaid Street

- All
- Energy
- Water
- Waste
- Transport

Transport

Replace one weekly commute with public transport
Your two petrol cars cover about 320 km a week, well above the average for a three-person household.

+6

Energy

Switch to a heat pump hot water system
Water heating accounts for roughly 1,800 kWh a year, about 30% of your electricity use.

+5

Energy

Add rooftop solar
You currently generate no solar. A 5 kW system would offset a large share of your 720 kWh monthly use.

+4

Water

Install low-flow shower heads
You use 168 kL a year against a 174 kL average, so there is less room to improve compared to your other areas.
